

# The Warren School

Andreas Lehner, Principal

March 2008

Dear Parents of Warren School Students,

We are beginning the process of building our classroom groups for the 2008-2009 school year, and we're looking for your input.

By Board policy, it is the principal's responsibility to make placement decisions, in the best interest of the students. Using all available information, including your input, I work with the staff to build balanced, positive and constructive learning communities in each classroom for the coming year. We strive for academic balance, gender balance, teacher compatibility, peer compatibility, and friendships.

The "Parent Input" form asks some specific questions that will help us see your child from your point of view. Your comments will be considered during the placement process to help us make the best placement for your child, taking into consideration his/her academic needs, social skills, behavior, work habits, and personal style.

The information you provide will be treated in confidence, shared only with his/her present and future classroom teachers, Learning Specialists on the sending and receiving teams, the Guidance teacher, and the administration for the purpose of assisting us in making placement decisions.

We'd appreciate receiving your response at your earliest convenience, by April 1 if possible.

Thanks.

Andreas Lehner,  
Principal
